My strengths include creativity, problem solving, dedication, and teamwork. I feel the most comfortable while working with others. I am timely and efficient with my duties and I'm always working to improve myself.

Ever since I was little, whenever I thought of something that interested me I would draw it so I could look at it with my own eyes instead of just in my head. All of the work I do is an outward expression of the emotions, inspirations, and desires that drive the client and myself in what we do. I create symbols that define us as a people and what we have to say.
